I wanted to take a minute to thank you and Mike Stoll for your efforts on the Baker Library project. This was the smoothest turnstile installation that we have been involved with in some time and most of the credit goes to you and your team. The design of the units made for a smooth installation and our service team is thrilled with the simple efficiency of the motor and controls.

We continue to receive praise for the beautiful custom work that was done with the turnstiles and the fact that they blend in so well with the surroundings. I know that this was no accident. It is obvious that the extra time you spent asking questions and reviewing the specific application translated into a top quality installation and a very happy customer. I am looking forward to working with you and the rest of the Aeroturn team in the future.

Thanks Again.  
Jerry Quinn
